Letter of Recommendation

Dear Sir or Madam,

I would like to strongly recommend Muhammad Afaq Jamshaid for future professional challenges. He completed his internship at LOGE Deutschland GmbH under my direct supervision.

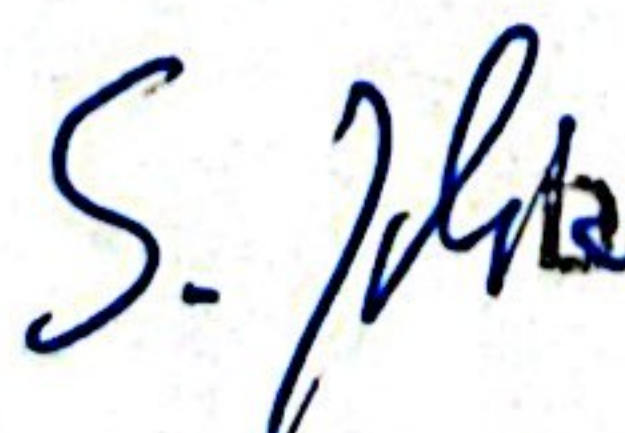

During his internship, Muhammad Afaq Jamshaid independently developed a machine learning algorithm that showed us significant optimisation potential for one of our products. His ability to independently design and implement innovative approaches is particularly noteworthy. As part of the brainstorming process, he contributed his in-depth expertise and made valuable contributions to the further development of the method, but was also able to accept criticism and implement suggestions for improvement. Thanks to his analytical way of thinking, he was able to develop an efficient solution that significantly improved our existing processes.

In addition, Muhammad Afaq Jamshaid impressed us with his ability to explain complex topics in the field of machine learning in an understandable way. Even to an audience with less experience in the field of artificial intelligence, he was able to convey his approaches clearly and comprehensibly.

With his work, he has not only demonstrated how our company can benefit from the process he has developed, but has also encouraged us to actively engage with the implementation of artificial intelligence in our simulation software.

His analytical skills, technical understanding and commitment make him a valuable asset to any team. I am convinced that Muhammad Afaq Jamshaid will continue to excel in his future career and therefore highly recommend him. Please do not hesitate to contact me for further information.

Yours sincerely,
